Product Designer at Kato

I design products. Then I **build** them.

Thirteen years making complex products simpler. I design the experience, build the front-end and help shape what gets built. At Kato, I've expanded into product management, taking a more active role in defining problems, prioritising work and getting the right things shipped.

Experience

Product Designer, Kato — Jan 2025 to present

Product design and front-end engineering, with product management responsibilities

- Owned in-app notifications end to end, from product management and design to front-end build and release: one notification centre for listing alerts, schedule invites, messages and @mentions, rolled out with a feature flag per type.
- Changed how the product team prototypes: built Claude workflows on our design system so anyone in product can create high-fidelity, on-brand prototypes themselves.
- Led design for the Society renewal experience: 98% of ~700 organisations paid by the deadline, and only 7 (1%) needed chasing for payment.
- Redesigned billing and payment journeys for 1,500+ organisations, supporting ~£1m in annual managed spend.
- Rebuilt the platform design system on tokenised design variables: one library powering consistent design and AI-generated code.

Product Designer, VenueScanner — Feb 2024 to Dec 2024

Contract

- Led end-to-end design of a 0 to 1 user dashboard, increasing engagement by 12%.
- Redesigned search and filtering, cutting zero-result rates by ~60%.
- Partnered with engineering on Google sign-in and secure one-time access links.
- Supported migration to Elasticsearch, improving search performance and speed.

Product Designer, Hinterview — Aug 2022 to Jan 2024

- Designed and shipped multiple product areas: Chrome extension, dashboard, insights and a new recording flow.
- Drove a ~35% increase in user adoption through improved UX and clearer flows.
- Built a design system, improving development speed by ~15%.
- Reduced no-shows by ~20% through onboarding and scheduling improvements.

UI/UX Designer, Jones & Palmer — Feb 2020 to Aug 2022

UI/UX Designer, MP Design — Jan 2017 to Feb 2020

Graphic Designer, Outré Creative — Mar 2015 to Jan 2017

Education

Memorisely, UI/UX Design
Shillington College, Graphic Design

What I do

Design — Core

- End-to-end product design
- Rapid & high-fidelity prototyping
- User research & usability testing
- Design systems & tokens
- Visual design

Strength
Clear, usable interfaces

Build

- AI-assisted front-end development
- AI prototyping workflows & tooling for product teams

Strength
From concept to production

Product — Growing

- Problem framing
- Product requirements & specifications
- Setting priorities

Strength
Problem definition & prioritisation

Toolstack

Design: Figma, Framer, Webflow

Build: Claude, Cursor, Codex, React, TypeScript

Collab: Linear, Notion, GitHub, Jira
